

babylons

Ultimate Web 3.0 Solutions Provider

What is Babylons ?

Babylons is an ecosystem governed by a unique DAO model serving as a community-governed NFT Platform, a premiere blockchain gaming aggregator, a cutting-edge launchpad and web3.0 technology solutions provider trusted by over 200 partners.

How Babylons powers Web3.0?

Web3.0 has become a catch-all term for the vision of a new, better internet.

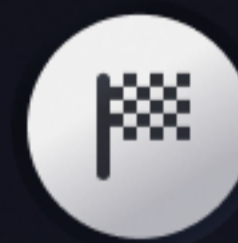

NFTs

GameFi

Music

SportsFi

Metaverse

Fashion

Identity

Entertainment

Creators can tokenize their works on our decentralized application to track and prove their rarity, authenticity and ownership history.

Collectors can trade valuable digital goods with royalties going back to the original creator each time an NFT exchanges ownership.

Inverstors can safely join INO/IDO events on Babylons Launchpad while **projects** meet with an eager community.

Entrepreneurs can utilize Babylons Incubation Programme (BIP) and/or various Babylons Services to get support while building their projects.

Community members can benefit from many Babylons activities simply by holding and staking \$BABI governance token.

Low-cost Minting

Create NFTs less than a dollar

Exhibit

Showcase your NFTs

Trade

Sell your own NFTs
Buy and collect NFTs

- Business Consultancy

DAO GOVERNANCE

- Vote for future decisions
- Utilize streamlined proposal process
- Meet like-minded people
- Enjoy unique privileges with \$BABI
- Gamified level system

Weekly reward sharing structure

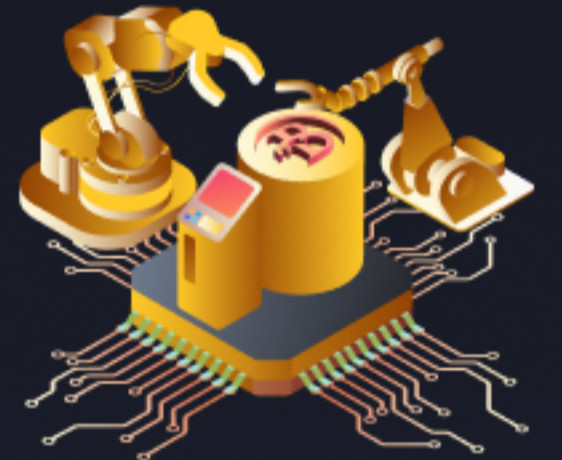

Stake Pools

Token stakers get 30% as rewards.

Operations

25% will go towards ongoing business and marketing operations.

Stored for buyback

25% will be used for buyback and buybacked tokens will be stored by founders.

Buybacked tokens will be stored for a certain time at the address that will be shared publicly.

Burned

20% will be used for buyback and buybacked tokens will be burned.

Half of the burnable coins will be burned weekly. Remaining halves will be held and burned all together in big burn events every 6 months.

- Given values and ratios are subject to governance committee decisions.
- Standard commission fee is 2% on all NFT trades on Babylons

Weekly airdrop mechanism for active users

Each week, 227,500 tokens are distributed to active users according to their share in the weekly total volume. Both buyers and sellers are eligible. Weekly reward airdrops will be terminated after 365 weeks when all reserved tokens get distributed.

Conditions

First 3 months*

If weekly total volume exceeds 5,000 BNB, 227,500 tokens will be distributed.

Otherwise, a certain number of reserved tokens will be sent back to weekly reward pool proportional to missing volume.

First 3-6 months*

The limit will be updated to 10.000 BNB

Limit

10.000 BNB

After first 6 months*

The limit will be updated to 15.000 BNB

Limit

15.000 BNB

Babylons Governance Token - \$BABI

Available on:

PANCAKE

ApeSwap

Contract: 0xec15a508a187e8DDfe572A5423Faa82Bbdd65120

\$BABI is our governance token. It is a deflationary fungible digital asset. Anyone can own the platform partially by utilizing \$BABI and vote on system upgrades.

More information about tokenomics, sale rounds and the infrastructure of \$BABI is officially released in detail on various platforms including our blog.
