Crpytowarriorz

Cryptowarriorz, is the first Blockchain game to combine the 3D RPG with Mining system.

The traditional mining games were made with low graphics and playability.

So the profit structure was the only interest of the users.

However, Cryptowarriorz combines the 3D RPG system with Mining to let the users enjoy watching their own character hunting monsters and mining, which makes the game more fun and playability.

Cryptowarriorz constantly improves the problems from traditional games through transparent, secure Blockchain technologies.

In traditional games, where the information of the accounts, or items were not properly saved, complete restore of hacked accounts was not possible. However, Cryptowarriorz has solved the problem by utilizing Blockchain technology.

Additionally, high-priced items and rare items within the games will be open transparently, Non-replicate items and game currencies will assure the users with higher trustworthiness. Also users can trade items with NFTs Matic network's technologies.

Also, we aim to set up an interesting airdrop platform that, unlike the existing airdrop platform, shows users participating in events in games and taking airdrops directly with their hands by installing airdrop mines in Cryptowarriorz.

Cryptowarriorz

3D RPG

Hunting monsters and leveling up can increase mining bonus

You can grow quickly using a variety of items

From increased mining bonus, users can get more daily limited CZ token

Mining

There are three methods of mining: manual mining, automatic mining, and automatic mining bot employment

Also, the winning team in the 2vs2 team mining battle is taking away the cost of the losing team

Airdrop Platform

Users have the privilege of mining the coins of other projects they build to promote in the Cryptowarriorz

Users can mine the coins of other projects in addition to the CZ token

Cryptowarriorz

Business model

1. 20% of CZ token paid by users when they purchase items are operating profits for the company.

2. Users spend 5,000 cz each to participate in the three-minute 2vs2 Team Mining Battle.

The winning team takes away the CZ token from the losing team.

A three percent CZ token is used for the operation of the company

3. Application for the production of airdrop Event mine: $4,000 to $8,000

(The cost of the mine increases as the Cryptowarriorz users.)

Cryptowarriorz

Expected Profits

On the right is a graph of the Cryptowarriorz's one-month profits estimate as the number of user increases.

We aim to build a new airdrop platform. Therefore, from the moment when the number of user exceeds 1,000, profits will increase by a large margin.
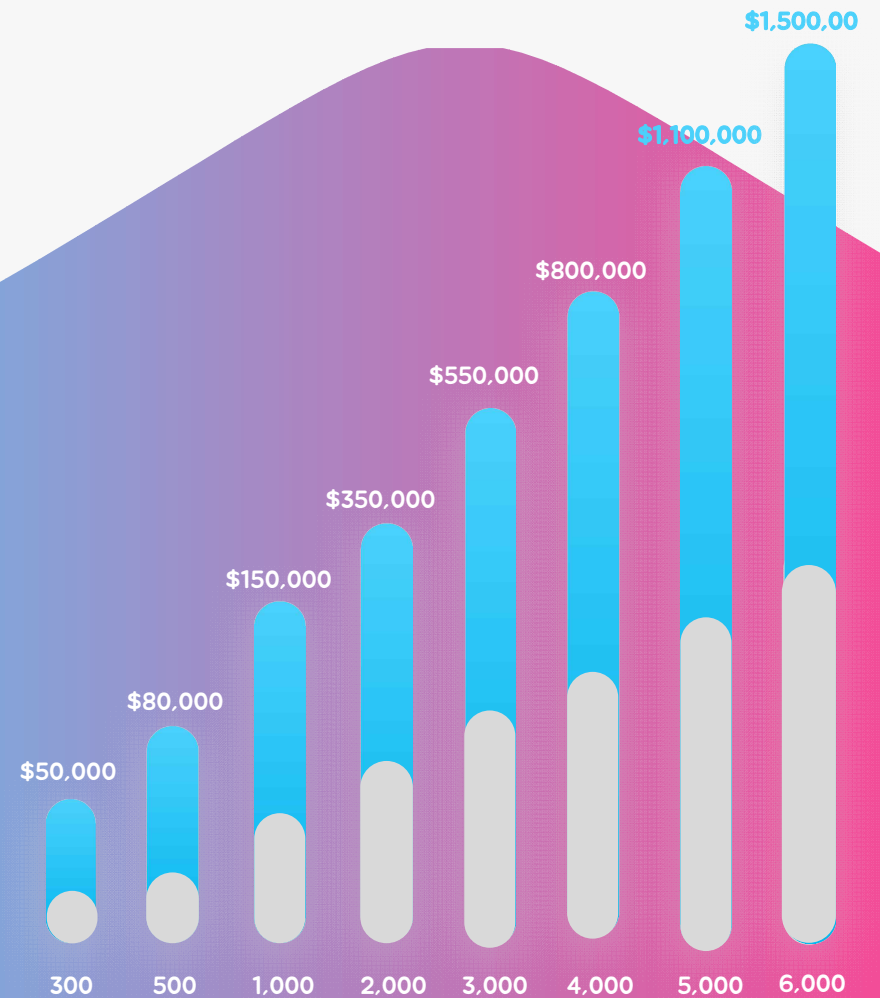

We expect the profit to rise significantly as the number of user increases after the number of user exceeds 1,000.

Profits

As number of users increases, Crpytowarriorz's profits will be maximized.

### Users

We aim for 6,000 users in a year.

Users	Profits
300	$50,000
500	$80,000
1,000	$150,000

Mining & Burning

On the right is a graph of the Cryptowarriorz's Mining & Burning structure estimate as the number of user increases.

Because Cryptowarriorz is only able to mine as much as a set amount every day, people who mine on a first-come, first-served basis benefit.
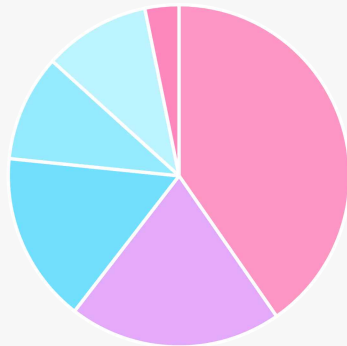

As a result, the use of tokens increases over the mine when users become more user in the future, and the value of tokens increases over time.

We expect the burning to rise significantly as the number of user increases after the number of user exceeds 650

CZ is the main token used for various transactions and rewards within the Cryptowarrierz ecosystem.

The CZ token allows advertisers to build and promote mines in the Cryptowarrior World.

The CZ token can be exchanged on an external exchange and also serves as a liquidity supply in the game.

80% of CZ revenue generated within the game is burn, and 20% of CZ is operating profit.

Team and operation token is locked up for two years, and after two years, it is distributed by 5% every month.
